I am an enthusiastic and self motivated person with experience in a number of different work environments. Being always conscientious and professional in outlook helps me to adapt and change to new environments and situations. I am a good worker under pressure, enjoy working as part of a team and am always looking to improve and develop new skills relating to my what ever work I am involved in.

Until recently and for the last twelve years I ran my own business being a Personal Agent to various well known sports, TV, business and political personalities. This has resulted in my being involved in many different projects from Corporate Hospitality, Marketing, PR and the Motivational Speakers sector's.

After twenty years in business I decided to take up a new challenge with a community focus, working to improve the situation for Gypsy's and Traveller's and disadvantaged "hard to reach" minorities.
